## Centenary Gable End

The Fielders Centenary Gable End range is engineered for strength and designed to complement any style of house.

The Fielders Centenary Gable End range available in both 108mm and 158mm portals, allows for gable widths beyond 10 metres. The gable unit can be attached to an existing structure or installed as a freestanding unit. Centenary's gables are available in 15, 20, 25 or 30 degree roof pitches, the greatest variety of pre-engineered gables on the market today.

All gables have the option of a full polycarbonate, partial polycarbonate or full Colorbond® steel roof. The unit has the flexibility of any gutter style, varying infill types and decorative finishes, such as finials.

- Available in attached or freestanding designs.
- Larger spans to accommodate your needs.
- Large variety of roof and gutter profiles available.
- No unsightly collar ties.
- Wide choice of colours to choose from with no need for painting.
- Two-piece roll-formed beams mean no warping, splitting or knot filled beams that you get with timber.
- Engineered up to a height of 4 metres.
- We custom make so non-standard jobs are our speciality.
- Available in two different sized gables.
